Freefoam
LIFETIME
Guarantee

The Freefoam Guarantee is backed by leading-edge Technology

Due to its leading-edge technology, Freefoam can offer a ground breaking 50 year lifetime transferable guarantee on all white* roofline and rainwater products, and a 10 year transferable guarantee on all coloured* and foiled woodgrain* products. Fortex white cladding products are covered by the standard 20 year guarantee, while Fortex coloured cladding products are covered by the 10 year guarantee. The lifetime guarantee is backed by Freefoam's environmentally friendly, lead free formulation and subject to the terms and conditions outlined below.

The 10 year colour guarantee is backed by Freefoam's innovative Colormax® technology which provides ground-breaking colourfastness, colour variety and colour matching. By using a proprietary formulation that contains a unique selection of stabilisers and pigments specially chosen for their high

colourfastness properties, Freefoam can confidently offer a wide range of colours.

The 10 year foiled woodgrain guarantee is backed by market leading Renolit EXOFOL MX foil incorporating its Solar Shield Technology (SST). SST offers built-in sun reflection which reduces heat absorption, thus minimising profile temperature and expansion. Guarantee certificates are now available on all of the above products through Freefoam's online guarantee registration system.

Customers not availing of the online registration system to obtain a certificate will qualify for the standard 20 year guarantee on all white products. All guarantees are subject to terms and conditions as outlined on our website (www.myfreefoam.com).
